CONTENTS OF VOLUME 201

No. 1. *March* 1969

PAGE

Elastic constants of the human lens capsule. By R. F. Fisher . . 1

The significance of the shape of the lens and capsular energy changes in accommodation. By R. F. Fisher 21

Biophysical and mechanical properties of red and white muscle fibres in fish. By T. Hidaka and N. Toida 49

Effects of catecholamines on the cholinergic neuromuscular transmission in fish red muscle. By T. Hidaka and H. Kuriyama . . 61

Renal receptors evoking a spinal vasomoter reflex. By W. S. Beacham and Diana L. Kunze 73

Cardiovascular responses in apnoeic asphyxia: role of arterial chemoreceptors and the modification of their effects by a pulmonary vagal inflation reflex. By Jennifer E. Angell James and M. de Burgh Daly 87

Hypoxaemia and aortic chemoreceptor function in foetal lambs. By G. S. Dawes, Sheila L. B. Duncan, B. V. Lewis, Claudie L. Merlet, J. B. Owen-Thomas and J. T. Reeves 105

Cyanide stimulation of the systemic arterial chemoreceptors in foetal lambs. By G. S. Dawes, Sheila L. B. Duncan, B. V. Lewis, Claudie L. Merlet, J. B. Owen-Thomas and J. T. Reeves . . 117

Metabolism, sperm and fluid production of the isolated perfused testis of the sheep and goat. By J. L. Linzell and B. P. Setchell . . 129

The longitudinal tissue impedance of the smooth muscle of the guinea-pig taenia coli. By T. Tomita 145

The slowing of gastric emptying by nine acids. By J. N. Hunt and M. T. Knox 161

The molecular dimensions of porcine neurophysin and some thermodynamic parameters of the reaction with lysine vasopressin. By M. Ginsburg and P. J. Thomas 181

Transcellular transport of isosmotic volumes by the rabbit gall-bladder *in vitro*. By O. Frederiksen and Paul P. Leyssac 201

Responses of normal and denervated cat superior cervical ganglia to some stimulant compounds. By D. A. Brown 225

PAGE

Spontaneous activity of single neurones in the hypothalamus of rabbits during sleep and waking. By ALAN L. R. FINDLAY and JAMES N. HAYWARD 237

No. 2. *April* 1969

The effect of vagotomy, vagal cooling and efferent vagal stimulation on breathing and lung mechanics of rabbits. By W. KARCZEWSKI and J. G. WIDDICOMBE 259

The role of the vagus nerves in the respiratory and circulatory responses to intravenous histamine and phenyl diguanide in rabbits. By W. KARCZEWSKI and J. G. WIDDICOMBE 271

The role of the vagus nerves in the respiratory and circulatory reactions to anaphylaxis in rabbits. By W. KARCZEWSKI and J. G. WIDDICOMBE 293

Changes in contractile properties of disused soleus muscles. By GERALD D. FISCHBACH and NORMAN ROBBINS 305

Functional consequences of tenotomy in hind limb muscles of the cat. By P. G. NELSON 321

The secretion of electrolytes and enzymes by the pancreas of the anaesthetized cat. By R. M. CASE, A. A. HARPER and T. SCRATCHERD . 335

The role of a renal thirst factor in drinking induced by extracellular stimuli. By J. T. FITZSIMONS 349

Calcium movements across the membrane of human red cells. By H. J. SCHATZMANN and F. F. VINCENZI 369

The relation between the 5-hydroxytryptamine content and aggregation of rabbit platelets. By H. R. BAUMGARTNER and G. V. R. BORN . 397

5-Hydroxytryptamine uptake and release in relation to aggregation of rabbit platelets. By H. R. BAUMGARTNER 409

The optical activity of bleached retinal receptors. By GABRIELLE M. VILLERMET and R. A. WEALE 425

The time course of red cell lysis in hypotonic electrolyte solutions. By A. J. BOWDLER and T. K. CHAN 437

Wave-length discrimination at the foveal chromatic threshold. By M. E. WILSON 453

Non-linear summation of unit synaptic potentials in spinal motoneurones of the cat. By M. KUNO and J. T. MIYAHARA 465

Analysis of synaptic efficacy in spinal motoneurones from 'quantum' aspects. By M. KUNO and J. T. MIYAHARA 479

Membrane current and intracellular sodium changes in a snail neurone during extrusion of injected sodium. By R. C. THOMAS 495

No. 3. *May* 1969

PAGE

A lesion of the transverse tubules of skeletal muscle. By J. N. Howell 515

The influence of activity on some contractile characteristics of mammalian fast and slow muscles. By S. Salmons and Gerta Vrbová 535

The effect of CO_2 on ventilation and breath-holding during exercise and while breathing through an added resistance. By T. J. H. Clark and S. Godfrey 551

Permeability of lung capillaries to macromolecules in foetal and newborn lambs and sheep. By R. D. H. Boyd, June R. Hill, P. W. Humphreys, I. C. S. Normand, E. O. R. Reynolds and L. B. Strang . 567

The relation of membrane changes to contraction in twitch muscle fibres. By P. Heistracher and C. C. Hunt 589

Contractile repriming in snake twitch muscle fibres. By P. Heistracher and C. C. Hunt 613

The effect of procaine on snake twitch muscle fibres. By P. Heistracher and C. C. Hunt 627

The effects of changes in haematocrit on the intrarenal distribution of blood flow in the dog's kidney. By F. S. Nashat, F. R. Scholefield, J. W. Tappin and C. S. Wilcox 639

Sodium influxes in internally perfused squid giant axon during voltage clamp. By I. Atwater, F. Bezanilla and E. Rojas 657

Hypoxia and pulmonary arterial pressure in the rabbit. By J. B. Owen-Thomas and J. T. Reeves 665

Frequencygrams of rabbit spindle primary endings elicited by stimulation of fusimotor fibres. By Françoise Emonet-Dénand and Y. Laporte 673

The effects of age and environmental temperature on the blood concentrations of glucose, free fatty acids and glycerol in new-born rabbits. By M. J. Hardman and D. Hull 685

Acetylcholine and related enzymes in the neural lobe and anterior hypothalamus of the rabbit. By K. Lederis and A. Livingston . . 695

Electrical activity in the supraoptic and paraventricular nuclei associated with neurohypophysial hormone release. By R. E. J. Dyball and Kiyomi Koizumi 711

Transmission from preganglionic fibres in the hypogastric nerve to peripheral ganglia of male guinea-pigs. By J. G. Blackman, P. J. Crowcroft, C. E. Devine, Mollie E. Holman and K. Yonemura . 723

Cat colour vision: one cone process or several? By N. W. Daw and A. L. Pearlman 745

The nature and location of certain phasic mechanoreceptors in the cat's foot. By Bruce Lynn 765

PROCEEDINGS OF THE PHYSIOLOGICAL SOCIETY

13–14 *December* 1968

SYMPOSIUM
